## DETAILED ACTION

### *Election/Restrictions*

1. Claim 21 is generic and allowable. The restriction requirement as set forth in the Office action mailed on August 17, 2006 has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claims 26-27 are directed to the non-elected species is no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

2. In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

### *Allowable Subject Matter*

3. Claims 21-27, and 29-48 are allowed.

4. The following is an examiner's statement of reasons for allowance:

With respect to claims 21-27 and 29-37, the reasons for allowance were set forth in the previous office action.

Art Unit: 3616

With respect to independent claim 38, the prior art references either alone or in combination fail to disclose, teach or suggest a vehicle driveline component particularly comprising: a yoke member coupled to the shaft and adapted for connection to a propeller shaft; and a wheel fixed for rotation with the shaft and disposed between the housing and the yoke member, the wheel defining a leading surface and a trailing surface with a duct extending therebetween that is adapted to draw air therethrough when the wheel is rotated. These structures in combination with other structures as recited in claim 38 define over prior art of record.

With respect to independent claim 45, the prior art references either alone or in combination fail to disclose, teach or suggest a vehicle driveline component particularly comprising: a shaft member extending outwardly from the housing; a yoke member coupled to the shaft member; and a wheel fixed for common rotation with the shaft member and disposed between the housing and the yoke member, the wheel including a leading surface and a trailing surface with a duct extending therebetween such that the duct draws air toward the housing when the wheel is rotated. These structures in combination with other structures as recited in claim 45 define over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
